

Business Overview

RE: Red Angus Embryo & Sperm Bank with Superior Pedigreed Cattle

Specifications

 Price \$1,100,000	 Location South Central Nebraska	 Service Area Continental US
--	--	--

SUMMARY OF THE BUSINESS –

Prill Cattle presents an opportunity to acquire elite Red Angus and Show Cattle (Club Calf Genetics), embryo and rare semen banks, embryo interests, DNA for cloning nationally and internationally prominent individuals, tanks and show equipment. These cattle have power, style, excellent skeletal structure, sound hooves and udders. Their dispositions make them enjoyable to manage and proud to own. They perform at the ranch and in the show ring.

Many of the Red Angus have extremely rare or pure foundation pedigrees. There is demand both domestically and internationally for these bloodlines, as frozen genetics have been exported to South America, Mexico and Australia.

The Show Cattle Genetics include members of the “Heat Wave” family and his dam “Teri”, with the opportunity to clone her. These are some of the most valuable, highly proven pedigrees in the industry. Also included in the Offering are numerous embryo interests and a “Heat Wave” grandson.

Great cattle herds are special. At Prill Cattle, we are passionate about breeding and promoting superior genetics and improving the American cattle industry. We would like to continue to be involved with these cattle

and will consider overseeing the management, breeding decisions, development, promotion and marketing for the new owner(s).

Included in the frozen semen bank is ***“0244 Miller Choctaw Chief 373”***. *This internationally renowned sire was recently selected by the USDA Meat Animal Research Center to represent the Red Angus breed in the National Germplasm Evaluation.*

Sire Progeny

The National Red Angus Sire Summary Progeny test data concerning progeny of
“0244 Miller Choctaw Chief 373”. The data shows his progeny were 8% USDA
PRIME,
84% PREMIUM CHOICE and 8% LOW CHOICE. *He produced NO USDA Selects*
and
NO Yield Grade 4 or 5 carcasses.

“0244 Miller Choctaw Chief 373”

(For Reference Only)

This Offering presents excellent opportunities and flexibility concerning mating decisions and marketing.

In addition to profitability, progeny of Red Angus dams such as “Savannah” give a program various marketing options and national prominence. They are best described by excellent pedigrees, impressive carcass data, power, muscle design and shape. The semen bank contains impressive bulls -- winners of regional and national shows and proven sires of breed-leading progeny. Sires such as “Gunsmoke” and “Rob Roy” are practical, predictable and profitable.

"Red Northline Rob Roy 122K"

"PC Gunsmoke 3212"

Highlights of the offering are the frozen genetics of extremely rare breed foundation genetics, including "D0202" of Pioneer fame -- ***other than this dispersion, frozen straws of the "D0202" sire can't be found anywhere***. The semen bank includes the "D0202" son, "H3554" and very rare ampules of paternal brothers "Choctaw Chief 373" and "Tajs Chief".

Red Angus Embryo Bank

0306 X New Trend 22D (0306/02N011/E1547) – 2 embryos

9221 X Forster 7184 (SP 7) – 4 embryos
